Digital Craftsmen™

Assess | Optimise | Manage | Improve

Actionable reports that allow your business to reduce cloud costs by 30%-40% with <u>zero</u> downtime.

How It Works

1 Provide read-only access to your billing files on AWS, Microsoft Azure or Google Cloud.

2 Digital Craftsmen will analyse your log files and provide a checklist of action items.

3 Working with your team, you can **reduce costs by up to 40%** with minimal hassle.

Digital Craftsmen™

Assess | Optimise | Manage | Improve

Key Recommendations Include:

1. **Terminate unused assets** including VMs, unattached storage volumes, empty load balancers and idle instances that no longer serve a purpose.

2. **Optimise remaining assets** for cost and performance by rightsizing your infrastructure. We will provide a list of VMs and workloads that can be optimised.

3. **Schedule start-stop times** for non-production infrastructure. Did you know an 8am-8pm schedule can save you up to 65% on operating costs?

4. **Change pricing tariffs** and leverage volume discount programmes by consolidating usage under a master billing account or by buying through a broker.

5. **Automate and tag** everything properly. We can audit your infrastructure to identify security weaknesses and correctly tag your projects.
